Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by McShirley (3,921,044). McShirley teaches a method for making an in situ restoration with an impactor 11 comprising dispensing paste into a dental cavity (column 1, lines 31-32), activating a solenoid 29 such that a hammer 79 is forced into an anvil 17, compacting the past with the tip of the anvil, and repeating the steps until the cavity is filled (inherent),

Claims 25 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Noll et al (3,751,807). Noll shows a pneumatic paste feeder comprising a paste source 40 for holding paste, a paste feeder tube 43 connected between the paste source and a dispensing tip, and a pneumatic supply source 35 for moving the paste from the paste source to the tip (with the aid of spring 19).

Claim 27 is rejected under 35 U.S.C. 102(b) as being anticipated by Thiel et al (3,816,922). Thiel shows a mechanical paste feeder comprising a paste source 19 for holding paste, a paste feeder tube 21 connected between the paste source and a dispensing tip, and a constant displacement apparatus 35 for moving the paste from the paste source to the tip in controlled, preselected amounts.

Allowable Subject Matter

Claims 1-19, 21-24 are allowed.

Specification

The disclosure is objected to because of the following informalities: Reference numeral 41 refers to grooves (paragraph 0028, line 9) and a set screw (paragraph 0033, line 9).

Appropriate correction is required.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "53" has been used to designate two different elements in Figure 1. Also, reference character "58" has been used to designate two different elements in Figure 2. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
